Are you a registered student?

Or

Are you eligible to participate in the Erasmus+ programme?

Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a great opportunity for an IT student who wants to develop his skills as a front-end developer. Mentored throughout, you will participate in the modernisation of an industry leading software platform.

Tasks

- Participating in the design and development of a suite of software products
- Helping with coding to design a complex and hugely configurable product.
- Supporting the modernization of internal systems.
- User interface design

Desired Skills

- Bachelor's degree in computer science
- Experience and knowledge of software development languages such as HTML, CSS, C# and JavaScript
- Strong analytical and problem-solving skills
- Ability to work both independently and as part of a team
- Excellent attention to detail

The Host Company

Established in 1990, this host company has become a leading global provider of fleet management software with a large portfolio of enterprise-level clients. They have created innovative software that is used in over 180 countries around the world. This software is an easy-to-use web-based application that helps companies manage and automate the complete lifecycle of vehicles and assets, within a single, integrated fleet management system.
